

The Board of Directors have decided to increase membership subs from \$1,500 to \$1,700 for the financial year 1st April 2026 to 31st March 2027.

The \$100 bar levy will still be in place.

This in very round figures will increase income for the 2026/2027 financial year by approximately \$100,000.

I have been asked to mention just some of the reasons for the increase and will only willing to discuss or show those reasons.

In no particular order:

- * Green staff wages increased dramatically last year and we are only playing catch up.
- * Increase across the board to wages of 3.5% and superannuation of 1%.
- * We have invested heavily on new golf course equipment under lease agreement, so those obligations need to be met.
- * We need to spend some future TLC to repairs to our aging Clubhouse and furniture.
- * Repairs, repairs and even more repairs to the Clubhouse.
- * Our highly competitive electricity contract that was signed during COVID has now expired and we are faced with a new contract that although competitive as definitely not at the previous rates.

These are just some of the reasons but are the main ones for the increase and we intend to be on top of the game instead of playing continual catch up.

I've recently conducted a ring around of like clubs in Sydney and I think our pricing is still highly competitive for the product that we are offering.

As mentioned earlier please contact me at the club or ring me on 0419 166 778 to discuss.

As in previous years the quarterly or half yearly payment options are available.

Regards,
